Acoustic space dividers

by

gamlaa

EKO

Embellish a Workspace with Elegance, a geometric design with just a hint of color, and antiqued version with a subtle splatter of natural moss screens offer architectural and acoustic options for business spaces.

THE BENEFITS

Health

The preservation process involves solely unharmful & biobased materials, guaranteeing 100% biodegradable, hypoallergenic and non-toxic products.

Absorbing ambient noise from above

Maintenance

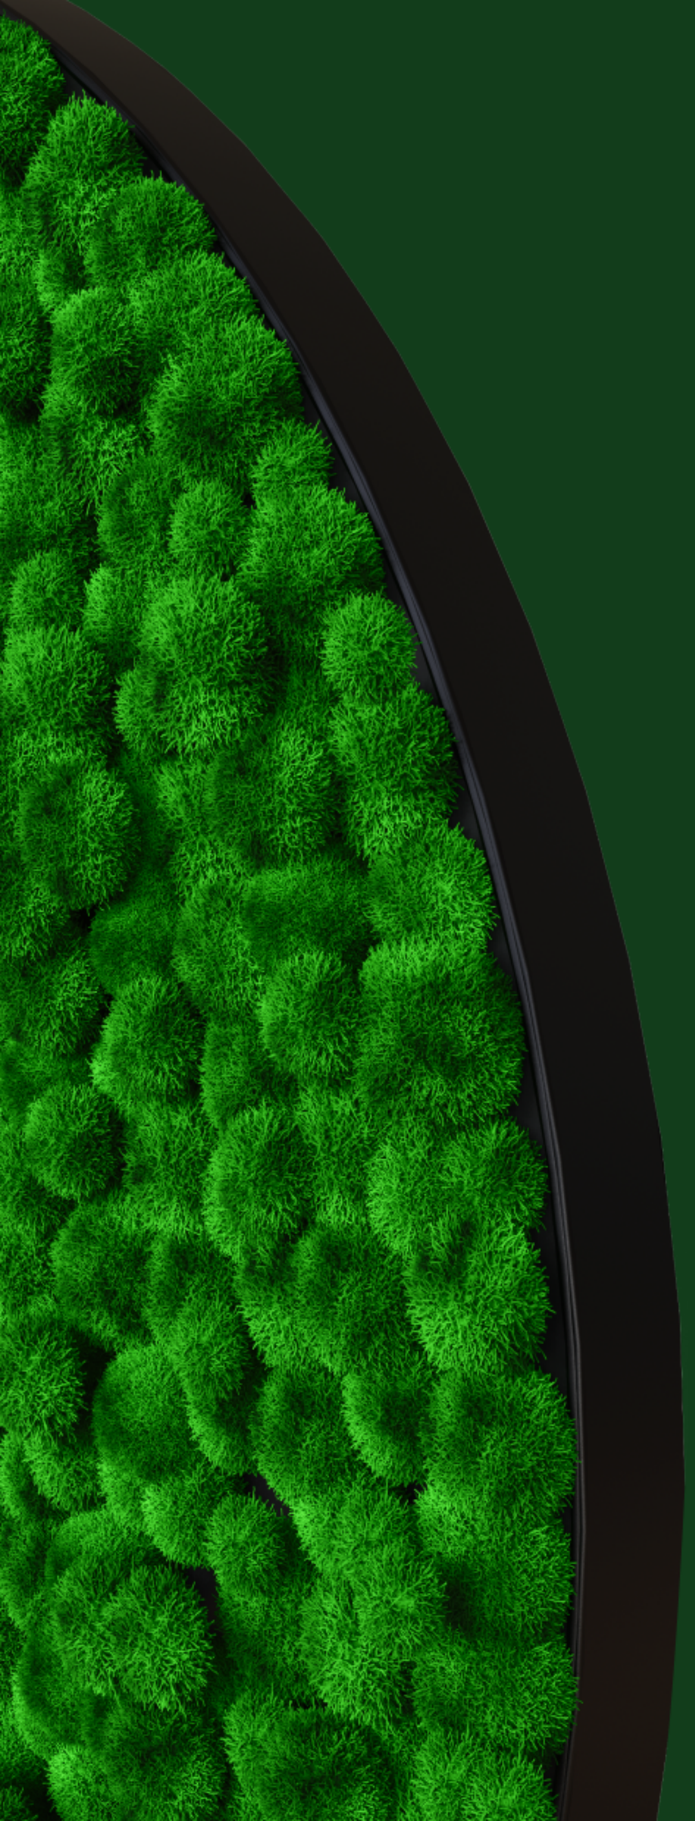

Preserved plants and mosses for indoor use only. That being said, they require no maintenance whatsoever: neither watering, pruning, nor even sunlight.

Nature connected to the ceiling

Durability

To achieve optimal durability, it is recommended to avoid exposure to direct sunlight and proximity to water or heat sources. As moss dries out when its environment does, it is strongly advised to avoid touching it. It will get back to the soft touch when humidity rises again and is a good humidity indicator.

Reducing Stree and promoting wellness

ARCHITECTURAL INSPIRATION

Riding over the forest canopy at this spectacular edifice to the south in Hechtel-Eksel is one of the many excellent senses available in Bosland. The Fietsen door de Bomen inspired a circular cycling path 700 meters long.

ARCHITECTURAL INSPIRATION

The bent building will be 4,000ft long and feature all glass windows, because of the innovative design the team needed to design an elevator system that could do things that no other elevators did before.

ARCHITECTURAL INSPIRATION

Its sleek design soars impressively. Simply going inside the building, to the centre of its hollow oval tower will give you a sense of its grandeur. The tower opens out towards the Cathedral.

EKO-LEAF

ARCHITECTURAL INSPIRATION

The roof functions as a large leaf, shielding all of the house's enclosed sections as the in-between open spaces, which are the most significant ones, from the scorching sun. The core of the design represents these in-between open areas.
